Bangladesh · Remote since 2020

6+ years in eCommerce development

2× Adobe Commerce certifications

6 core user journeys automated with Playwright

3 payment & logistics gateways integrated

■ SUMMARY

Software developer and QA automation engineer specializing in eCommerce. I build PHP features in Laravel and Adobe Commerce, integrate payment, logistics and SAP APIs, and write the Playwright and n8n automation that keeps platforms reliable, with a focus on scalable, well-tested systems and AI-driven workflows.

■ SKILLS

Backend	PHP (OOP), Laravel, Zend MVC, API development & testing, webhooks
eCommerce	Adobe Commerce (Magento), WooCommerce, WordPress, custom PHP solutions
Integrations	SAP, Stripe, SSLCommerz, Pathao, third-party APIs, AI chatbot integration
QA & automation	Playwright, TypeScript, n8n, API response-time testing, Jira test cases
Cloud & DevOps	AWS (EC2, S3, Load Balancer), Docker, Linux, VMs, CI/CD
Data & search	MySQL, MariaDB, Elasticsearch, OpenSearch
Tools	Git, Bitbucket, Jira, Confluence, Postman, SoapUI, Xdebug, Chrome DevTools

■ EXPERIENCE

Software Developer & QA Automation Engineer · WOOW Global Inc.

Feb 2025 – **Present**

Bangladesh · Remote · International shipping, logistics and AI-driven eCommerce (ChatShop)

- Engineered Playwright/TypeScript E2E suites for six core journeys: login, signup, order, payment, Buy For Me, Ship For Me.
- Automated chatbot flows, image processing and system-to-system sync with multi-step n8n workflows and webhooks.
- Developed features across the Laravel backend, admin panel and customer website, including invoice and order engines, role-based coupons, and Stripe, SSLCommerz and Pathao integrations.
- Contributed to ChatShop: AI chatbots for customer support, plus AI web scraping and caching for real-time data retrieval.
- Ran API response-time comparisons between Development and Live environments to keep deployments free of bottlenecks.
- Trained every new WOOW employee as part of new-hire onboarding.

Jr Software Engineer · devArtisans

Feb 2023 – **Present**

New York, USA · Remote · Digital agency delivering eCommerce and digital experience solutions

- Engineered custom Adobe Commerce (Magento) modules to client requirements, following Magento coding best practices.
- Designed APIs that integrate SAP and other third-party systems, backed by thorough backend API testing, and led account synchronization initiatives including Rennova.
- Managed AWS (EC2, S3, load balancers), Linux servers and VMs, and Docker containers for efficient deployment.
- Partnered with business analysts and QA to clarify requirements and validate acceptance criteria.

PHP Web Application Developer · CartHub Solution Inc

Jun 2020 – Sep 2022

New York, USA · Remote · Web application agency

- Built and maintained Zend MVC applications, including an Invoice Management System that streamlined financial processes.
- Automated and integrated fulfillment portals with stock control, accounting applications and third-party services to improve operational efficiency.
- Developed PHP and MySQL eCommerce sites and company WordPress sites, tuned for performance and security.
- Ran SEO, Google Ads and Analytics, and managed cloud hosting on 1&1 and GoDaddy for performance, security and uptime.

■ PROJECTS & HIGHLIGHTS

- Security updates & performance tuning:** security updates and database and performance optimization for a production website.
- Infrastructure & performance monitoring:** ongoing infrastructure and performance monitoring for a production website.
- Data engineering:** DP-900 Data Engineering Fundamentals training and advanced SQL challenges.
